

METRO INDUSTRIES, INC.

GASKETS AND SEALS

Over 7,000 Standard Parts

Aerospace

Agriculture

Electronics

Storage Tanks

Products:

Rubber Washers
Rubber O-Rings
Rubber Grommets
Plastic Washers
Sponge Stripping

Services:

Die Cutting
Water Jet Cutting
Roll Slitting
Laminating
Shearing

Over 1,000 Gasket Materials in Stock!

A Little About Us...

Founded in 1967 by Norman Garrett, Metro Industries, Inc., has distinguished itself as a premier manufacturer-distributor of rubber gaskets and seals plus custom die cut, molded, and extruded components for virtually every industry under the sun. During the last 42 years, Metro has grown from a small, family owned and operated shop to a world-class supplier of large and small original equipment manufacturers and distributors, including many multinational Fortune 500 companies.

Now beyond three relocations and numerous expansions, Metro has evolved with the times, largely due to the high standards of customer satisfaction built in from the beginning by Founder Norm Garrett. For instance, even before demands for shorter lead times and on time deliveries became industry standards, Metro incorporated both early and late shipment dates that print on all work orders and systematically measured our own performance. As quality demands of original equipment manufacturers have increased, Metro responded by formalizing its QA procedures into a complete ISO-9001:2008 program. And Metro never needed a formal partnership agreement or other solicitation to continually seek ways to cut our customers' cost and/or improve the quality of their components. Maybe we're old fashioned, but the Metro way has always been aimed at nothing less than 100% customer satisfaction and that has proven to more than cover whatever else our clients require.

Though we can and do gladly comply with often rigid requirements set forth by large companies, we haven't lost our interest in serving the small guy or skipped a beat in our willingness or ability to respond to unique circumstances. Although others see things differently, we have found focused diversity an enhancement to our business, not a handicap. For instance, serving the requirements of smaller companies and demands isn't really any different than serving the special requirements of larger companies, which we consider an essential element of our own success. The same goes for our dual focus on standard and non-standard products: By applying inventory and supply systems designed for standard products to selective custom fabricated products, we are able to supply even custom designed OEM components as though "virtual" standard off-the-shelf products. Conversely, our expertise in custom fabrication makes non-standard variations of "standard" products into "virtual" standard products for us

By concentrating on customer satisfaction, we are like a self-motivated, self-correcting employee -- the kind of supplier that is good to have around.

Metro Industries' Quality Policy

Metro Industries' quality system is certified to comply with the internationally recognized quality standard ISO 9001 by NSF, an ANAB accredited registrar. We are also a certified "self release" supplier to a well-known Fortune 100 manufacturer of aerospace avionic equipment and maintain similar status with numerous other equipment manufacturers in the aerospace, transportation, medical equipment, automotive, and other industries.

Following is Metro Industries' Quality Policy as shown in our Quality Manual, a copy of which is available to customers on request:

Metro Industries, Inc. is committed to uncompromised quality as the essential ingredient of every aspect of management, procurement, material storage and handling, administration, sales, engineering, production, packaging, and shipping. Our objective is to insure that all products meet or exceed all customer expectations, including, but not limited to product specifications, delivery schedule, and documentation requirements.

Therefore, it is our policy to:

- Maintain a quality management system that meets requirements of the ISO 9001:2008 standard.
- Insure that all employees are sufficiently trained and equipped to fulfill the requirements of the quality policy, procedures, and objectives.
- Document, objectively measure, and summarize quality and on time shipment performance as necessary to identify, correct, and improve the effectiveness and compliance.
- Conduct periodic management reviews of the quality management system towards the end of continually improving its effectiveness in achieving objectives.

Custom Die Cutting Since 1967

For over 46 years, Metro Industries has specialized in steel rule die cutting parts for a wide variety of industries. We have automated presses that can efficiently stamp out hundreds of thousands of tiny die cut parts, as well as very large machines capable of die cutting parts that take two or three people just to handle each one, and rotary die cutting and punching for continuous length strip gaskets (like tank stripping).

Die Cutting Presses

Almost all die cutting can be done on several types of presses, but often at a cost of additional labor and/or material waste. With an array of press types and sizes having bed sizes up to 24" x 72" and generating up to 75 tons, MI is equipped to efficiently handle most die cutting requirements by truly matching each job to the type and size of press best suited to the task.

- 40 Ton Automated Hydraulic Punch Press 12"x 12" Cutting Area
- 20 Ton Automated Hydraulic Punch Press 12" x 20" Cutting Area
- 60 Ton Mechanical Punch Press 18" x 24" Cutting Area
- 75 Ton Mechanical Punch Press 24" x 36" Cutting Area
- (2x) 30 Ton Hydraulic Swing Arm Clicker Presses 18" x 30" Cutting Area
- 60 Ton Hydraulic Beam Clicker Press 24" x 72" Cutting Area

Steel Rule Die Cutting

With over 10,000 dies and various types of presses ranging from 20 to 75 tons, MI can efficiently die cut intricate parts smaller than a pencil eraser as well as gaskets spanning 8 feet or more. Steel rule dies are economical, minimum quantities are generally low, and they can easily be adapted to easy-setup clicker presses for large parts and/or low quantities as well as automated punch presses for higher volume requirements. Non-recurring steel rule tooling costs, where applicable, begin around \$75 and average around \$140.

Die Cut Plastic Shims

MI carries a full line of standard and semi-standard [plastic shims](#) from .003 to .030, and can easily manufacture virtually any design to customer specifications with little or no tooling charges.

Polyester (Mylar) film is the most common material for plastic shims because of its durability and relatively low cost, but MI is capable of die cutting shims out of numerous types of plastic film according to application requirements. Color coding is also a useful feature Metro can provide.

Standard, online pricing and specifications is forthcoming, but please call or write for assistance.

Mechanical Shearing

Used primarily in the preparation of sheeted materials for subsequent die cutting and other finishing processes, our mechanical shearing capabilities are one of Metro Industries core manufacturing capacities.

Cut to Size Gasket Squares and Rectangles

Our Mechanical Shear is ideal for low run custom pads and shims. With over 1,000 materials in stock we can turn around most Shear to Size orders in 7-10 Working Days and in some cases 3-5 Days.

Roll & Log Slitting Services

As a primary function of our **steel rule die cutting** operation, **sponge stripping**, **rubber tank stripping**, and several other products and services, Metro Industries incorporates three in-house **slitting** processes capable of precisely slitting most soft to semi-rigid rolled materials. **Machine slitting** capacities go up to 60" width and 36" diameter rolls with some limitations.

Custom Roll Slitting & Partial Roll Slitting

In addition to custom services, partial rolls of most materials are available slit-to-width at very low minimums. This includes a wide variety of **sheet rubber**, **sponge rubber**, **vegetable fibers**, **corks**, **vulcanized fiber (fishpaper)**, **paper products**, **plastic films**, **plastic sheets**, and other **gasketing materials**. Most are available with standard **pressure sensitive adhesives** with peel-off backing or engineered grades for special application requirements.

Standard price lists complete with quantity breaks are forthcoming, but we hope you'll give us an opportunity to quote any requirements you have in the meantime. We don't think you'll regret it. We would also be happy to provide technical assistance and/or quotation on any material roll slitting or slit material requirements you have...and the price of that is always free.

Laminating

Our laminating services incorporate several different types of equipment and fixtures in order to bond layers of materials and, more commonly, to apply pressure sensitive adhesive and peel-off liners, an option available on most materials. This is commonly done prior to final die cutting or slitting to final configuration.

Rubber Extrusions

General Information

Metro Industries supplies numerous standard **Extruded Rubber products**, including **O-Ring Cord**, 'P' Seals, 'D' Seals, 'T' Seals, and many other standard and non-standard shape and size configurations.

Extruded rubber is a good method of compounding and curing rubber when the desired product is given to being run in continuous lengths of the same cross section. Like shapes fabricated from sheet rubber, tooling costs are relatively low in general, and the process is very versatile insofar as rubber compound and configuration ranges go. Extruding can often be combined with other post-cure processes like cutting to length, punching holes, die-cutting notches, vulcanizing, etc., making it a good alternative to rubber molding in some cases.

Extruded Rubber Compounds

Most rubber compounds can be adapted to rubber extrusion processes. Compounds Metro typically deals with include the following:

- Silicone
- EPDM
- Viton
- TPR

Materials, Products, Services

Using a wide array of manufacturing processes, MI has been providing precision formed custom parts and components for about every type of machine and equipment under the sun for nearly four decades. In addition to nearly all molded and extruded rubber products, we offer two-dimensional shaped parts fabricated from rubber, plastic, textile, fiberglass, cork, and various compressed and composition type gasket sheets — about anything less brittle and more pliable than steel, glass, and wood.

Custom Fabrication Services

Since those seeking information on custom fabrication services commonly have different perspectives, information, etc., we've outlined our **Custom Fabrication Capacities** three-ways (details below):

1. **Manufacturing Processes** – Parts, products, and services in relation to base manufacturing processes (e.g. molded or extruded rubber, die cut gaskets, roll slitting, etc.).
2. **Materials** – Parts, products, and services related to base materials (e.g. rubber gaskets, Teflon™ spacers, Mylar™ insulators, etc.); regardless of form, we are able to competitively quote most products fabricated from listed material categories.
3. **Product Nomenclatures** – Parts or components based on application nomenclatures and descriptions (PCB insulators, high temperature gaskets, pipe flange gaskets, etc.).

Molded Rubber Compounds

Most rubber compounds can be adapted to molding processes. Compounds Metro typically deals with include the following:

- SBR
- Neoprene
- Buna-N/NBR/Nitrile
- Silicone & Fluoro-Silicone
- FKM
- TPR (Thermo-Plastic)
- Urethane
- Natural and Gum Rubber

How to Order

Call, email, or fax according to your own format, procedures, or preference. Many products lines include "Design-Your-Own" illustrated inquiry forms for your convenience:

- Phone: 816-763-7277 (local) or 800-545-8578 (toll free) – Ext. 302 or 350 (or 0)
- Fax: 816-763-0476
- Email: custserv@metrogasket.com

Please include to the extent known:

- How to Contact you.
- Billing Address.
- Shipping Address (if different from Billing; no P.O. Boxes, please).
- MI Style Codes, Part Numbers, and/or Specification References, if known.
- Additional Information, Specifications, Drawings.
- Order Quantity, Price, and requested Delivery Date.

NOTE: Please DO NOT include Credit Card information via insecure electronic means like email and online inquiry forms.

Order Processing

- Your order will be personally reviewed, assigned a Control Number, and entered into our system.
- If Credit Card or other information is needed, our customer service representative will contact you.
- Your order will be acknowledged within one business day with a projected ship date.

Minimum Orders

There are **no preset minimum order** requirements on standard items besides minimum quantities listed on Price and Discount Schedules. However, to essentially the same effect, there are **Shipping & Handling charges on all standard product orders under \$100** (products only; tax, tooling, other charges excluded). Please see below for details.

Quantity and Multiple-Item Discounts

Most standard items already reflect substantial **quantity-based price breaks** plus generous **multi-item discounts** on their respective price-discount schedules. We would be pleased to quote cases meriting special consideration, such as:

- Multiple item orders going beyond listed quantity-pricing tiers or that involve more than one standard product group.
- Large quantities that substantially exceed high quantity list pricing.
- Combinations of items that might be produced together at notable savings (e.g. like gaskets that can be made within the center of another, or parts made of similar materials that might yield lower raw material costs).
- Custom die cut, extruded, or molded products: Send us your description, specifications, and/or drawings (noted with quantities and annual usage), and we'll give you a no-hassle quotation or custom price list.

Payment Options

- C.O.D. or Payment in Advance by Cash, Money Order, Cashier's Check, or approved Company Check.
- Credit Card – We will gladly process your Discover, MasterCard, Visa, or American Express cards.
- Electronic Wire Transfer – We are happy to accept payment by wire transfer, although there will be an additional \$10 charge to cover our banking fees plus customers are responsible for initiation, transfer, and any other related charges or fees.
- Establish Account – We would be happy to invoice your established company (Net 30) with approved credit. To establish an account, please provide at least three trade and one bank references. Past due accounts are subject to a 2% surcharge on the 31st day following shipment from Metro and an additional 1% every 30 days thereafter.

Shipping & Handling

- All shipments are **F.O.B. Grandview, Missouri** (zip code 64030), meaning goods are billed and become the property and responsibility of the customer upon shipment, not delivery.
- For the of determining Shipping and Handling charges, those related to shipment values include only actual product costs, not taxes, tooling, or other charges.
- Custom quoted products are typically quoted with collect or prepaid/add freight terms and shipped via customer preference.
- Standard priced products are subject to the terms detailed below.

Standard Shipping

Unless otherwise arranged, orders shipped within the continental United States will ship via standard UPS Ground, USPS, or other means chosen at our discretion. Serving also to cover our processing costs on small orders, Shipping and Handling charges are assessed as follows on standard shipments:

- **\$100 and up:** No Charge for standard UPS Ground, USPS or equivalent (chosen at our discretion).
- **Under \$100:** Flat charge equal to lesser of \$25 or the difference between \$100 and actual product costs (excluding taxes, tooling, and other charges).

Non-Standard Shipping

We will gladly ship via any available means requested, including all available UPS and Fed-Ex options, with shipping and handling fees on shipments within the continental United States* assessed as follows:

- **\$100 and up:** Flat charge of \$10* plus actual shipping costs, unless billed to your account.
- **Under \$100:** Flat charge of \$10* plus actual shipping costs (unless billed to your account) plus lesser of \$20 or the difference between \$100 and actual product costs (excluding taxes, tooling, and other charges).

* International (plus Alaska, Hawaii) shipment terms are the same as above except for a flat charge of \$25 rather than \$10.

Quantities

Order - Shipment Quantity Variances

Because of production and material variables, production runs typically yield minor variances in quantities, usually slightly over target. Therefore, unless otherwise arranged, orders may be shipped, invoiced, and considered complete within +/-5% of order quantities. We can routinely honor most 'Do Not Ship Over [Under]' requests by stating this as +0/-10% [+10/-0%], and will gladly consider alternate terms on a case-by-case basis.

Shipment Quantity Accuracy

Most of our products are precisely counted by mechanical means as they are produced and/or hand counted in packaging, eliminating most quantity errors. Some are counted using electronic counting scales, also, though this method is often unsuitable for precision counting very lightweight or parts that normally vary more than a percent or two in weight. For instance, 10,000 small die cut Mylar parts may weigh less than a pound, making even scales calibrated to +/- 1/100 of a pound accurate to only +/- 100 pieces before any other variables are considered, at best.

Because of these and other factors, and to avoid frivolous contentions, we have established standards based on the economic value of our products and the time and expense required for various levels of shipping quantity accuracy, as detailed in the table below. This ultimately saves us and our customers money, as the cost of precision counting parts that cost a few cents or even less than a penny each can easily exceed the value of the products themselves.

Therefore, unless otherwise established, the following quantity variance tolerances apply to all shipments of standard, semi-standard, and custom products:

IF the <u>Unit Price</u> is \Rightarrow and the <u>Quantity</u> is \Rightarrow	<\$0.25/unit	\$0.25-\$1.00/unit	>\$1.00/unit
	Shipping Quantity Tolerances		
<1,000 units	+/- 2%	+/- 1%	+/- 0.5%
1,000+ units	+/- 1%	+/- 0.5%	+/- 0.25%

Tooling Setup Charges

- **Flange Gaskets: No tooling charges** on any standard low or high pressure (ANSI B16.5 125-150#, 250-300#) ring type or full face styles, even in custom quoted material options. If necessary, semi-standard custom designs quoted using low cost steel rule dies, which average around \$120.
- **Rubber and Plastic Washers**: Tooling on standard styles only IF we don't have suitable tooling amongst our 12,000+ die inventory AND your order is less than \$500. Non-recurring (one-time) charge based on extended item list price: <\$100 @ \$75; \$100-\$249.99 @ \$50; \$250-\$499.99 @ \$25; No Charge on \$500+.
- **Sponge Weather Stripping**: No tooling charges on any standard, semi-standard, or custom style.
- **Rubber O-Rings**: No tooling charges on standard sizes, even in custom quoted materials.
- **Rubber Grommets**: No tooling charges on standard sizes, even in custom quoted materials.
- **Custom Die Cut, Extruded, Molded Products**: Tooling, Dies, Mold costs quoted on case-by-case basis as needed. When required, **Steel Rule and Punch Die** charges (our most common tooling option) begin around \$25 and average a little over \$100. **Rubber Extrusion Dies** usually cost between \$100 - \$500, and **Rubber Molds** begin around \$500 and run upwards of \$20,000 on complex, multi-cavity molds.

In most cases and unless otherwise specified, applicable tooling or production setup charges are intended as offsets for our actual costs. This means two things: 1) we maintain ownership of tooling, and 2) we physically maintain it at our cost in order to insure quality products on subsequent runs. There are exceptions to this on custom quoted items, generally in cases where rubber molds or other expensive tooling is involved. Since most of our tooling costs involve inexpensive (<\$200) steel rule dies which require ongoing maintenance and periodic replacement that often exceeds the initial cost over time, this policy is generally advantageous to our customers and simpler for us.

ASTM D-2000 Standard Elastomer Specification

One of the most referenced elastomer standards is the 'Standard Classification System for Rubber Products in Automotive Applications' published by the American Society of Testing and Materials (ASTM), or, more commonly, the ASTM D-2000 specification. Although obviously developed with the automotive industry in view, this standard has become perhaps the most frequently referenced standard for rubber products in general, and for good reason -- it is one of the most direct and simplest ways to define rubber properties as they pertain to general application requirements.

Because of its popularity, consumers and others are often confronted with an ASTM D-2000 callout that reads something like 'ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17.' Although this can appear rather foreboding to those not technically informed on rubber chemistry and properties, it is actually fairly simple to decipher. Using the aforementioned sample code, the individual elements of the D-2000 standard are as follows:

Specification Number	
ASTM D-2000 99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	
American Society of Testing and Materials primary specification reference number; sometimes abbreviated to "D2000".	
Revision	
ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	
Indicates the revision (year) of the standard.	
Units (Metric/English)	
ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	
If present, the 'M' indicates Metric units; otherwise, English measurements are indicated.	
Grade	
ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	
Grades 2 and up indicate additional requirements per Table 6 of the D2000 specification (see Suffix Requirements below).	
Type (Heat Resistance)	
ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	Typical Type/Class - Elastomer Chemical Group Associations
Indicates high temperature resistance as follows: A = 70°C/158°F B = 100°C/212°F C = 125°C/257°F D = 150°C/302°F E = 175°C/347°F F = 200°C/392°F G = 225°C/437°F H = 250°C/482°F	The standard does not directly specify rubber compounds or chemical groups (e.g. Neoprene, Buna-n, etc.). Rather, it sets forth Type and Class (Temperature and Oil Resistance) criterion ("BG" in sample) that, in turn, narrow the field of options based on application requirements. However, for reference only, D2000 lists the following typical associations between Type-Class designations and elastomer groups: AA - Butyl (polybutadiene), SBR, Natural, Polyisoprene, Reclaimed rubber AK - Polysulfides BA - Butyl, EPDM (Ethylene Propylene) BC - Neoprene (Chloroprene) BE - Neoprene (Chloroprene) BF - Buna-N (Nitrile, NBR) BG - Buna-N (Nitrile, NBR), Urethanes BK - Buna-N (Nitrile, NBR) CA - EPDM (Ethylene Propylene) CE - Hypalon (Chlorosulfonated Polyethylene) CH - Buna-N (Nitrile, NBR), ECH (Epichlorohydrin) DA - Ethylene Propylene DF - Polyacrylate DH - Polyacrylate, HNBR EE - Vamac (Ethylene Acrylic, AEM) EH - Polyacrylate (ACM) EK - FZ FC - Silicone (high strength) FE - Silicone FK - Fluorosilicone GE - Silicone HK - Viton™ (Fluoroelastomers) KK - Perfluoroelastomers
Ref: ASTM D573	
Class (Oil Resistance)	
ASTM D-2000-99 M2BG714-B14-EA14-EF11-EF21-EO14-EO34-F17	
Indicates oil resistance class by maximum volume swell as follows: A - No Requirement B - 140% C - 120% D - 100% E - 80% F - 60% G - 40% H - 30% J - 20% K - 10%	
Ref: ASTM D471	

ASTM D-2000 Standard Elastomer Specification Continued

Hardness

ASTM D-2000-99 M2BG**7**14-B14-EA14-EF11-EF21-EO14-EO34-F17

Shore A Durometer x 10; e.g. 7 in the example indicates 70 Shore A hardness. Ref: ASTM D2240

Tensile Strength

ASTM D-2000-99 M2BG**7**14-B14-EA14-EF11-EF21-EO14-EO34-F17

Stated in PSI (pounds per square inch) or MPa (megapascals), depending on whether English or Metric Units are indicated (see above). PSI can be converted to MPa by dividing by 145, or, conversely, MPa values can be multiplied by 145 to obtain PSI. Tensile strength in the sample is 14 MPa or 2,031 PSI. Ref: ASTM D412

Suffix Requirements (Alpha)	Suffix Requirements (Numeric)
ASTM D-2000-99 M2BG714- B 14- E A14- E F11- E F21- E O14- E O34- F 17	
Indicates tests and related criteria for various elements like specific aging, fluid compatibility tests. Each element is cited by an alpha code (below) indicating a particular property followed by a numeric code (right) that specifies test criteria (e.g. time, temperature, fluid).	Testing parameters and related details are further specified by the numeric component of Suffix codes, including test temperatures as follows:
A = Heat Resistance; ref: ASTM D573	Suffix Letters A, B, C, EA/F/O, G, K, L
B = Compression Set; ref: ASTM D395	1 = 73°F / 23°C 2 = 100°F / 38°C 3 = 158°F / 70°C 4 = 212°F / 100°C 5 = 257°F / 125°C 6 = 302°F / 150°C
C = Ozone or Weather Resistance; ref: ASTM D1171	Suffix Letter F
EA = Fluid Resistance (Aqueous); ref: ASTM D471	4 = -13°F / -25°C 5 = -31°F / -35°C 6 = -40°F / -40°C 7 = -58°F / -50°C 8 = -67°F / -55°C 9 = -85°F / -65°C 10 = -103°F / -75°C
EF = Fluid Resistance (Fuels); ref: ASTM D471	
EO = Fluid Resistance (Oils and Lubricants); ref: ASTM D471	
F = Low Temperature Resistance; ref: ASTM D2173	
G = Tear Resistance	
J = Abrasion Resistance	
M = Flammability Resistance	
P = Staining Resistance	
Z = Special Requirements	

*ASTM D2000 does not apply to thermoplastic rubbers. It does apply, however, to compounds including reclaimed rubber.

*All values (tensile, hardness, heat and fluid resistance, etc.) relate to ASTM standardized test procedures.

Viton® is a registered trademark of DuPont Dow Elastomers.

Standard Material Options	General Properties	General Chemical Resistance	
		Resistant to:	Attacked by:
<u>Generic Rubber</u>	Lowest cost option -- usually black Neoprene, EPDM, Buna-N, or Red Rubber (SBR), but may vary at our discretion. Do not select if application requires resistance to extreme temperatures, petroleum or chemical substances. Good choice for bumpers, pads, water and air line seals, or any application requiring nothing more than "rubber".	N/A	N/A
<u>Red Rubber (SBR)</u>	Good physical properties and abrasion resistance. Poor resistance to petroleum-based fluids. Common applications include water pipeline flange gaskets, plumbing washers.	Most moderate chemicals, wet or dry, organic acids, alcohols, ketones, aldehydes.	Ozone, strong acids, fats, oils, greases, most hydrocarbons.
<u>Neoprene</u>	Low cost option suitable for most rubber washer needs. Neoprene offers good weather resistance, flame retardance, and moderate resistance to petroleum-based fluids. Commonly used for water and air line seals, many other applications.	Moderate chemicals and acids, ozone, oils, fats, greases, many oils, and solvents.	Strong oxidizing acids, esters, ketones, chlorinated, aromatic and nitro hydrocarbons.
<u>High Grade Neoprene</u>	Similar to above but with enhanced physical properties like tensile strength, elongation, compression set. Good choice for dynamic seals where more durable elasticity and strength are important.		
<u>EPDM</u>	Excellent ozone, chemical, and aging resistance but poor resistance to petroleum-based fluids. Economical choice where weather and chemical resistance are important features.	Animal and vegetable oils, ozone, strong and oxidizing chemicals.	Mineral oils and solvents, aromatic hydrocarbons.
<u>Buna-N</u>	Excellent resistance to petroleum-based fluids. Good physical properties. Economical choice for gaskets and seals in gas engines and other equipment where petroleum-based oils, lubricants, and fuels are present.	Many hydrocarbons, fats, oils, greases, hydraulic fluids, chemicals.	Ozone (except PVC blends), ketones, esters, aldehydes, chlorinated and nitro hydrocarbons.
<u>FDA White Nitrile</u>	Similar to above, but made of FDA approved materials suitable for food processing and serving equipment.		
<u>Silicone</u>	Excellent high and low temperature properties. Fair physical properties.	Moderate or oxidizing chemicals, ozone, concentrated sodium hydroxide.	Many solvents, oils, concentrated acids, dilute sodium hydroxide.
<u>High Grade Silicone</u>	Same as above only with enhanced physical properties.		
<u>Viton™ (Fluoro-elastomer)</u>	Excellent oil and air resistance both at low and high temperatures. Very good chemical resistance.	All aliphatic, aromatic and halogenated hydrocarbons, acids, animal and vegetable oils.	Ketones, low molecular weight esters and nitro containing compounds.

Standard Size Rubber Washers & Rubber Disc

Metro Industries offers a variety of Standard Size Die Cut Rubber Washers out of a variety of materials including Neoprene, EPDM, Buna, Silicone and FKM (Viton®). Additionally our Custom Rubber Washers and Semi-Standard Rubber Washers provide over 500,000 sizes and configurations for virtually any application.

Factory Direct Rubber Washers

By Carrying thousands of materials in stock as well as having the majority of the steel rule dies already built we are able to ship orders on average in 3-4 Weeks. In some cases we can expedite production to ship orders within 7-10 Working Days but this generally comes with an expedite charge.

Made To Order Rubber Washers

Our Rubber Washers are Made to Order and generally have a lead time of 3-4 weeks to ship. In some instances we can Expedite Delivery but this often comes with additional cost for expedited production and transportation.

What You Need to Know About O-Rings

1. The temperatures it will be exposed to, especially if likely to involve extended periods below 0° F or over 200° F (-18° C -93° C); otherwise, it is unlikely that temperature ratings will be much of a factor.
2. Any chemical, fluids, gases, lubricants, or other elements that will contact the rubber seal, including ordinary things like water, sunlight, and atmospheric ozone.
3. The maximum pressure (psi) the seal will be subject to, especially if high pressure is involved.
4. Whether it is for a dynamic or static seal, the former type generally increasing the importance of properties like tensile strength, abrasion resistance, elongation, etc.
5. Any additional specification, like material type, durometer, color, tensile strength, elongation, or standardized composites such as published by organizations like the FDA, NSF, Military, AMS, ASTM, DIN, ISO.

Most applications citing specifications such as those named in #5 above already specify material type and can be purchased by vendors selling products designed to meet the same, bypassing the need for the more detailed investigation outlined below.

Will Standard Commercial Grade Buna-n O-Rings Work?

Since it is more likely than not that you won't need to look any further for a suitable material, we begin with the simple question, will **Buna-n o-rings** work? Not only are largely standardized **Buna-n O-Rings** the lowest cost and most widely available type by a wide margin across the market, it is also generally quite resistant to the kind of fluid and gas environment typically associated with o-ring seals like hydrocarbon fuels, petroleum-based fluids and lubricants, and vegetable fats. In contrast to other chemical groups of elastomers, Nitrile Rubber (or Buna-n, as more generically known), is a good quality elastomer in terms of tensile strength, elongation, and resistance to compression sets, tears and abrasion.

(By "good quality" we mean in very general terms in contrast to other common chemical groups of elastomers, not that there isn't a full range of good, better, and even what might be considered sub-standard products available in the highly competitive o-ring market.)

In most cases, two more questions are all that's necessary to know whether looking further at Buna-n is or investigating other options is warranted:

What temperature range will the o-rings be subject to?

Buna-n rubber compounds are generally rated between -40 F and +250 F service temperatures (be sure to check particular brand ratings before buying). Application-specific testing is strongly recommended where o-rings could be subjected to extended periods of time at or near the manufacturer's stated limits.

Rubber service temperature ratings are seldom ever stated as absolute, unconditional specifications. In most cases, rubber will degrade as a result of extended exposure to temperatures near or above the stated operating ranges, which can be exacerbated by the fluid

and gas environment. This is a result of a breakdown in the molecular bond that gives rubber its elastic properties, so the damage is generally permanent, even if very slow in development.

On the other hand, low temperature crystallization causes rubber materials to become brittle rather than elastic, but doesn't normally cause permanent damage in the same way as excessive heat. However, crystallized rubber can be damaged or broken much easier, and won't exhibit any real elastic qualities in such a state. Because of this, applications involving extended exposure near, but not beyond, the actual crystallization or "glass" temperature don't generate as great a risk of untimely failure as high temperature ranges.

What chemical fluid and gas elements will it contact?

Buna-n is known to exhibit generally good resistance to petroleum-based oils, greases and hydraulic fluids, aliphatic hydrocarbons like propane, butane, petroleum oil, mineral oil, diesel fuel and fuel oils, vegetable oils, organic fats, most silicone-based fluids and lubricants, alcohols, most HFA, HFB and HFC fluids, alkali and salt solutions, and some other chemicals.

If not Buna-N, then What?

The same factors apply, but if Buna-N doesn't appear to be a good option, a more broad array of materials must be considered. The next level of more or less standard materials, from the least to the most costly (in general), include Silicone, Viton® (Fluoro-elastomer), EPDM, and Kalrez® (perfluoro-elastomer). These or similar materials easily meet 90% of the remaining o-ring sealing requirements overall (after Buna-n) and are widely available through numerous sources, usually with feature-enhanced varieties as well as standard commercial grades.

As fluid and gas resistance is mostly determined by the chemical grouping of a compound, commonly published references are fairly reliable gauges of what can be expected in application, even if the information is general in nature. The following resources will usually provide sufficient information on this factor, though testing is always necessary for absolute certainty:

Metro Industries Standard Rubber O-Rings

Expanded PTFE Gasket Tape & Joint Sealant

Expanded PTFE Joint Sealant is made from 100% virgin PTFE and is flexible and conforms easily to irregular surfaces. Additionally it is easily compressed and exhibits excellent resistance to creep and cold flow. EPTFE offers excellent chemical resistance and is rated to temps from

EPTFE Joint Sealant

Expanded PTFE Joint Sealant is available in a variety of sizes and comes with a self adhesive backing to facilitate easy installations.

EPTFE Gasket Tape

Expanded PTFE Gasket Tape offers the same great properties as the Expanded PTFE Joint Sealant but comes in different sizes.

Industries Commonly Used In:

- Pulp and Paper
- Food & Beverage
- Distillers
- Petro Chemical
- General Chemical

Standard Rubber Grommets

Online Sizes, Specifications, Pricing

MI's standard line of **rubber grommets** includes 123 different size options made of durable high grade **SBR rubber** (the same base elastomer of most tires), which is engineered to resist abrasion, tearing, ozone and weather-related aging, and moderate petroleum product resistance.

Three-Way Discount

1. Volume Discounts in 3-tiered price columns.
2. Multi-Item Discounts: 6+ item orders automatically priced in next lower tier than otherwise applicable.
3. FREE Shipping & Handling on orders over \$100 (see Order Info for details, limitations).

No Tooling Charges on Standard Grommet Sizes

All standard dimensioned grommets are available (with zero tooling/mold costs) in other compounds suited to particular application requirements like **Neoprene**, **EPDM**, **Silicone**, **Buna-N**, and **Viton™ (Fluoroelastomer)**. We would be happy to assist and/or quote according to your needs.

Minimum Rubber Grommet Orders

We are working towards offering select rubber grommets in lower quantities, but in the meantime, minimum purchases begin under \$100 per item, with generous price breaks for greater quantities PLUS multiple item orders. We will gladly try to work with you on breaking orders into smaller releases, and would appreciate the opportunity to special quote requirements for over 12 rubber grommet styles, quantities notably exceeding our standard price breaks, or to meet target or competitive pricing pressures.

Semi-Standard & Custom Rubber Grommets

MI has innumerable standard and semi-standard sized **rubber grommets** available, and can supply virtually any configuration of size, style, and material compound...without expensive tooling/mold costs in many cases.

High Temp	180°F/68°C	250°F/107°C
Tensile Strength, Max/psi	2500	3000

General Properties (for comparison purposes) P = Poor, F = Fair, G = Good, E = Excellent	SBR	Buna-N
Resilience	G	F
Impact Strength	E	G
Abrasion Resistance	E	E
Tear Resistance	F	G
Oil Resistance	P	E
Fuel Resistance	P	E
Weather Aging	F	G
Oxidation	F	F-G
Heat Aging	G	G
Water Swell Resistance	E	E
Flame Resistance	P	P
Electrical Resistance	E	F

Sponge Weather Stripping

Metro Industries is a premier manufacturer and worldwide wholesale distributor of **sponge weather stripping seals** in convenient roll lengths. Our full line of 432 standard styles covers most application requirements, and our nearly infinite range of semi-standard styles covers about everything else.

Standard Weatherstrip™ is offered in 4-tiered quantity-based pricing starting under 4¢ per lineal foot (in quantity); minimum purchase requirements begin around \$100 on some styles (less than \$400 max). Quantity minimums are from 1 to 40 rolls, depending on style.

Standard Weatherstrip™ Options Include:

- Soft & Medium Hardness Options
- Stripping Thickness from 1/8" to 1/2"
- Slit Widths from 1/2" to 6" Wide
- Optional Peel and Stick Adhesive Backing

Metro Industries
